

Discover Jiangsu-2024 NJUPT Summer School Program!

About NJUPT

Nanjing University of Posts and Telecommunications (NJUPT) is a national "Double First-Class" university established in 1942 with a focus on engineering, particularly renowned for its **electronic information** specialty. It is recognized as the "**Cradle of IT Talent in China.**" Based on "**information materials, information devices, information systems, information networks, and information applications,**" it has attracted young talents from various countries to study and exchange. NJUPT has more than 30,000 full-time students including 1000 international students from over 70 countries.

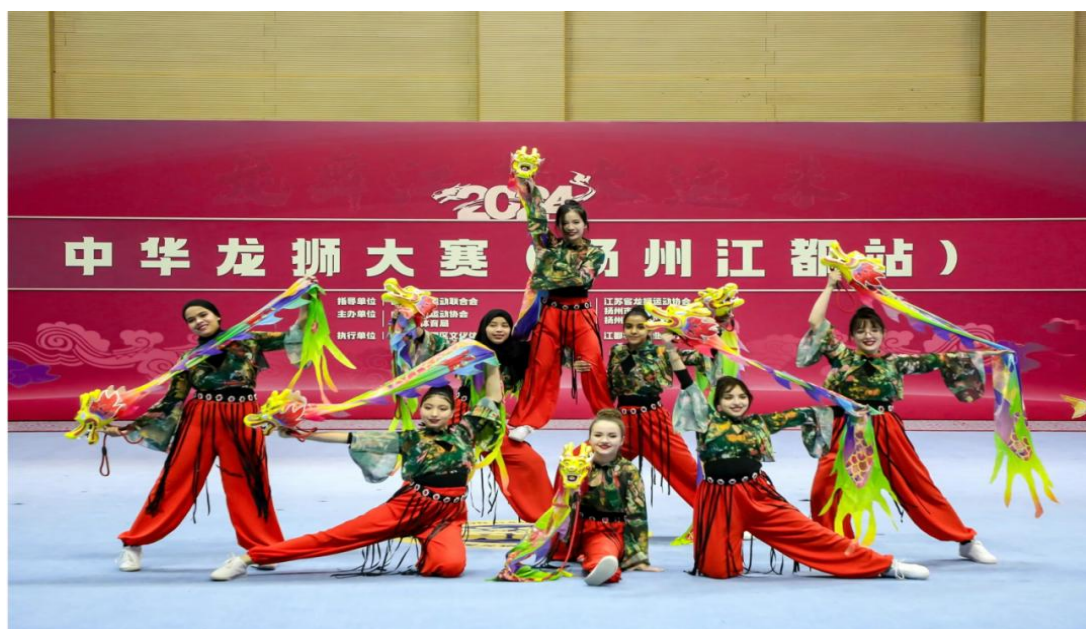

About the Program

This program will introduce **the new achievements and technologies in the emerging interdisciplinary research field of flexible electronics.** The lectures and seminars given by Prof. Qiang Zhao, Vice President of NJUPT and National Outstanding Youth, and other professors will cover the related topics about the frontier of future technologies in **flexible optical functional materials and devices,** etc. Additionally, **laboratory visits and practical sessions** will be organized for the participants, and **cultural social activities** include Nanjing City Walk and Chinese cultural activities.
