1. Description

1.1. Subject details

Name of the subject	103000685 - Data analysis
No of credits	4.5 ECTS
Type	Compulsory
Academic year ot the programme	First year
Semester of tuition	Semester 1
Tuition period	September-January
Tuition languages	English
Degree programme	10AP - Eit digital master's programme in data science
Centre	10 - Escuela Tecnica Superior de Ingenieros Informaticos
Academic year	2018-19

3. Prior knowledge recommended to take the subject

3.1. Recommended (passed) subjects

El plan de estudios Eit Digital Master's Programme In Data Science no tiene definidas asignaturas previas recomendadas para esta asignatura.

3.2. Other recommended learning outcomes

- big data basics

- data bases

- machine learning

4. Skills and learning outcomes *

4.1. Skills to be learned

CE01 - Capacidad para la integración de tecnologías, aplicaciones, servicios y sistemas propios de la Ingeniería Informática, con carácter generalista, y en contextos más amplios y multidisciplinares.

CE08 - Capacidad para analizar las necesidades de información que se plantean en un entorno y llevar a cabo en todas sus etapas el proceso de construcción de un sistema de información.

CG10 - Conocimiento y comprensión de la informática necesaria para la creación de modelos de información, y de los sistemas y procesos complejos

CG14 - Capacidad de trabajar y comunicarse también en contextos internacionales

4.2. Learning outcomes

RA95 - The ability to propose a well-founded approach in any domain where big data can play a role.

RA96 - The capacity to identify and link the key issues related to the use of big data in the main economic, industrial, societal and scientific domains

* The Learning Guides should reflect the Skills and Learning Outcomes in the same way as indicated in the Degree Verification Memory. For this reason, they have not been translated into English and appear in Spanish.

5. Brief description of the subject and syllabus

5.1. Brief description of the subject

In this course we will deepen on the importance of data for an organization. In fact, the course is centered on the process of extraction of knowledge from databases as a support for decision making.

This course will be adapted depending on the students profile but main goal will be to deepen on the importance of data for an organization and deepen on the data lifecicle

Consequently the course will start with the analysis of data sources in an organization and very briefly analyzed data base management systems.

Later students will understand the data value chain and will go deep into the process of knowledge extraction. At this stage CRISP-Dm methodology will be used.

The course will follow on the different phases of the process: i) business undertanding, ii) data understanding, iii) data preparation, iv) modeling v) evaluation and vi) deployment.

Through all the phases the main emphasis will be on students getting hands on the different steps, techiques, algorithms and tools.

Before finisishin the course will cover basic aspects of the GDPR and the implications on the process of knowledge extraction in a company

The course will end with use cases in different domains.

5.2. Syllabus

1. Introduction

    1.1. Course description.

    1.2. Data Science and Data Scientist Skills.

    1.3. The Value hidden in data.

2. Operational Data bases Vs Decisional databases

    2.1. The BIG Data Value Chain.

    2.2. Data Warehouse.

    2.3. Data Lakes

3. The process of Knowlegde Discovery in Databases

    3.1. CRISP-DM

4. Business Understanding

    4.1. Goal of BU.

    4.2. Planning of a DataScience project.

5. Data Understanding

    5.1. Understanding data.

    5.2. Nulls and outliers detection.

    5.3. Correlation analysis

6. Data Preparation

    6.1. Preparing data for mining: dealing with problems encountered in understanding, transforming data, discretization, data reduction, agregation, ?.

7. Data mining/data modeling

    7.1. Type of problems. Data nature , data problems and possible algorithms.

    7.2. Classification, association and clustering

    7.3. Complex Networks

8. Evaluation and Deployment

    8.1. Evaluation of the models.

    8.2. Deployment of the models

7.2. Assessment criteria

The "only final exam" evaluation will only be offered if the UPM "Normativa Reguladora de los Sistemas de Evaluación" requires so in the academic year 2015-2016, and the procedure to opt in will be as stated by the head of studies.**Continuous evaluation:**The course will be evaluated by:

- 2 practical assignments,
- 1 exam

.Attendance is mandatory (It is allowed not to attend up to 6 hours without proper justification)

Practical assignments will be done in groups among those enrolled in the course at the beginning of the academic year (nature and number of components will be stablished at the beginning of the course, depending on the number of students enrolled).

In order to pass the course in the fall semester the requirements are:

- 1. To obtain a minimum of 50 points out of 100 in the added evaluation.
- 2. It is MANDATORY to do the exam and do the practical assignment.
- 3. In the exam and on the practical assigments students must obtain a minimum of 40%.

Final score will be calculated as follows:

- 45% Practical assignment (divided between the two assigments)
- 10% Oral presentation
- 45% Final exam

Final exam evaluation Those students whose extraordinary circumstances cannot perform the continuous evaluation, and having done the final exam evaluation written petition during the first 15 days of the course, will perform the final exam evaluation without having the opportunity to do the continuous evaluation;

Those students failing to attend 85% of of the lectures will also do the final evaluation.

In these premises, the final exam evaluation will consist of an exam as stated by the head of studies.

Measures against copies and fraud Rights and duties of college students are gathered on the statues of the

Universidad Politécnica de Madrid (BOCM de 15 de noviembre de 2010) and in the statutes of the college student (RD 1791/2010 de 30 de diciembre).Article 124 a) of EUPM fixes the duty of the student... "to follow with responsability and taking advantage of the learning process, knowledge adquisition correspondent to its condition of college student"... and the article 13 of the statutes of the college student in its point d) also specifies as duty of the college student "abstain from the use or cooperation in fraudulent procedures in the evaluation assessments, in the assignments developed or in the official documents of the university".In the case that in the development of the evaluation assessments it is appreciated a breach in the duties as college student, the subject coordinator may communicate the headmaster as established in the article 74 (n) of EUPM to have the competences to "propose the initation of a disciplinary procedure to any College member, by its own initiative or as instance from the "Comisión de Gobierno"" to the Rector, pursuant to the statutes and rules of application.
