## 7.2. Assessment criteria

### Continuous evaluation:

Online tests: One for each chapter; 10 multiple choice questions. If the result is at least 7/10, the test will add 2% to the final grade, **up to 10%** altogether.

Written tests: They take place out of normal lecture hours. The students must answer to questions regarding subject contents (including definitions, statements of theorems, exercises and problems). At least 70% of assessment will correspond to basic contents. Language precision and rigour in the results will be demanded.

Lab projects: 5 lab projects must be done along the term. Work will be done in pairs. The contribution of each project to the final grade will be 6%. Project assessment: Procedures, 50% (efficiency, clarity, documentation); solved problems, 40%; mathematical rigour, elegance, language precision, 10%.

Lab test: A validation test will take place in the lab, where some problems must be solved by using the functions programmed in the lab projects. This test will weigh a 20% of the total grade.

### Final exam only, and july examination session

Students choosing the final exam option must apply for it before November 24th, using the tool in Moodle. Final exam will take place as scheduled by the school administration. The exam will have two parts: a written test

regarding subject contents (including definitions, statements of theorems, exercises and problems), and a lab test where some problems must be solved by means of the functions listed in the lab projects (which each student must do in advance and bring to the exam). Each part will weigh 70% and 30% of the final grade, respectively. The function list and specifications will be published in Moodle.

## ADDENDUM

Developing the UPM Evaluation Policy, subject teachers state that:

1. For a student to be examined on a date other than the scheduled exam, it must necessarily be verified the following circumstances:
  - (a) The reason the student is unable to attend the exam must be overselling and force majeure, legally established or sufficiently estimated by the Head of Studies. The concept of force majeure must be understood as the existence of an unpredictable external cause affecting the sufferer by preventing the fulfilment of an obligation.
  - (b) In these cases, in order for the test to take effect on a different date and time than the scheduled one, affected students must notify the coordinator, via email or telephone, no later than 48 hours and send the documents that prove the reason he/she were unable to attend. Otherwise, the test will not be re-tested.
2. If a copy is detected on any ongoing evaluation test, the students involved will have zero rating in the ordinary call. In addition, they will need to conduct a review defense in a oral procedure in the extraordinary call.

If there exists a copy in the extraordinary examination, the facts will be reported to the Rector for the opening of a disciplinary file.

## 9. Other information

### 9.1. Other information about the subject

En previsión de posibles recidivas de la epidemia de COVID, la presente guía contempla la impartición de la asignatura en formato bimodal: todas las actividades formativas planificadas inicialmente como actividades presenciales, en caso de ser necesario pasarán a desarrollarse a través de plataformas online. En caso de que esto ocurriera, se notificará en el moodle de la asignatura todas las acciones a realizar, el nuevo material (si procede), etc.
