1. Description

1.1. Subject details

Name of the subject	103000901 - Information Retrieval, Extraction And Integration
No of credits	4.5 ECTS
Type	Optional
Academic year of the programme	First year
Semester of tuition	Semester 2
Tuition period	February-June
Tuition languages	English
Degree programme	10BA - Master Universitario en Ciencia de Datos
Centre	10 - Escuela Tecnica Superior de Ingenieros Informaticos
Academic year	2020-21

2. Faculty

2.1. Faculty members with subject teaching role

* The tutoring schedule is indicative and subject to possible changes. Please check tutoring times with the faculty member in charge.

3. Skills and learning outcomes *

3.1. Skills to be learned

CECD01 - Conocer los procesos de captura, extracción, manipulación y conversión de datos en diferentes entornos.

CG06 - Especificación y realización de tareas informáticas complejas, poco definidas o no familiares

CG07 - Aplicación de los últimos o más novedosos métodos para resolver problemas que, posiblemente, involucren a otras disciplinas

CG09 - Integración del conocimiento de distintos campos de estudio

CG14 - Capacidad de trabajar y comunicarse también en contextos internacionales

3.2. Learning outcomes

RA21 - Conocer cómo se aplican las técnicas de computación científica en algún campo específico de ciencia o ingeniería

RA33 - understand and apply information retrieval systems

RA32 - Understand and design information extraction systems

RA34 - Apply AI techniques in real world data scenarios

* The Learning Guides should reflect the Skills and Learning Outcomes in the same way as indicated in the Degree Verification Memory. For this reason, they have not been translated into English and appear in Spanish.

4. Brief description of the subject and syllabus

4.1. Brief description of the subject

The amount of available data in any area has grown dramatically during the last years. However, this increment did not have a proportional impact in the knowledge available for decision making. There is a need of automatic models to manage the data, taking into account that the majority of the data will never be used by a human being. The course Information Retrieval, Extraction and Integration is focused on the necessary tasks to extract information, models to efficiently retrieve data for further integration. These are critical tasks to provide relevant information for decision making, which complexity increases with the amount of data available. As application areas, we focus on biomedicine, due to the complexity and to the specific requirements.

4.2. Syllabus

1. Basic Concepts
 - 1.1. Introduction
 - 1.2. Data, Information and Knowledge
 - 1.3. Data types
2. Extraction and Information Retrieval
 - 2.1. Information Extraction
 - 2.2. Information Retrieval Models
 - 2.3. Natural Language Processing
 - 2.4. Web Search Engines
 - 2.5. Non-textual Data
3. Data Integration
 - 3.1. Integration Architectures
 - 3.2. Semantic Interoperability
 - 3.3. Data Provenance
4. Applications in Biomedicine
 - 4.1. Sistemas de información biomédica
 - 4.2. Estándares de interoperabilidad clínica

4.3. Vocabularios biomédicos

4.4. Sistemas de recuperación de literatura científica

6.1.3. Referred (re-sit) examination

No se ha definido la evaluación extraordinaria.

6.2. Assessment criteria

Ordinary evaluation

The final grade of the subject will be calculated from the qualifications of an individual work and 3 group work.

Individual work. After the presentation of the first unit of text mining, students must do a assignment. The qualification of this work will be 25% of the final grade.

Group work on the application of data extraction from images. An implementation, a brief report and a presentation in class should be made. The qualification of this work will be 25% of the final grade.

Group Work on search engines. The qualification of this work will be 25% of the final grade.

Group Work on Semantic interoperability. The qualification of this work will be 25% of the final grade.

Modality of extraordinary evaluation

In the ordinary call, the choice between the system of continuous evaluation or the system of evaluation by final test corresponds to the student. Anyone wishing to follow the evaluation system by means of a final test only, must **MUST** notify it **DURING THE FIRST 15 DAYS** from the beginning of the teaching activity of the subject, by writing to the Prof. Coordinator of the subject to be delivered within the established deadline. The qualification in case of final evaluation will be through exam.
