1. Description

1.1. Subject details

| Name of the subject | 103000907 - Time Series Data Mining | | | |
|--------------------------------|--|--|--|--|
| No of credits | 3 ECTS | | | |
| Туре | Optional | | | |
| Academic year ot the programme | First year | | | |
| Semester of tuition | Semester 2 | | | |
| Tuition period | February-June | | | |
| Tuition languages | English | | | |
| Degree programme | 10BA - Master Universitario en Ciencia de Datos | | | |
| Centre | 10 - Escuela Tecnica Superior De Ingenieros Informaticos | | | |
| Academic year | 2021-22 | | | |

2. Faculty

2.1. Faculty members with subject teaching role

| Name and surname | Office/Room | Email | Tutoring hours * |
|---|-------------|------------------------------------|--|
| Juan Pedro Caraca-Valente Hernandez (Subject coordinator) | D4301 | juanpedro.caracavalente@u pm.es | Tu - 09:00 - 12:00 Th - 10:00 - 13:00 |
| Aurora Perez Perez | D4301 | aurora.perez@upm.es | M - 10:30 - 13:30 Th - 10:30 - 13:30 |

* The tutoring schedule is indicative and subject to possible changes. Please check tutoring times with the faculty member in charge.

3. Skills and learning outcomes *

3.1. Skills to be learned

CECD01 - Conocer los procesos de captura, extracción, manipulación y conversión de datos en diferentes entornos.

CECD03 - Manejar las herramientas informáticas para Big Data

CG08 - Capacidad de pensamiento de forma creativa para desarrollar aproximaciones y métodos nuevos y originales

CG11 - Conocimiento y comprensión de la informática para crear modelos, así como sistemas y procesos de información complejos

3.2. Learning outcomes

RA14 - Presentar en público los resultados de sus trabajos de investigación

RA31 - Understand the basics of the Knowledge Discovery Process, and its application to time series and complex data

RA30 - Know how to select and apply the best candidate techniques to Time Series Data Mining projects

* The Learning Guides should reflect the Skills and Learning Outcomes in the same way as indicated in the Degree Verification Memory. For this reason, they have not been translated into English and appear in Spanish.

4. Brief description of the subject and syllabus

4.1. Brief description of the subject

Knowledge Discovery techniques (or Data Mining) in large volumes of information are widely used today in different domains such as medicine, banking environments, industrial systems, etc. with a wide variety of applications such as data analysis, fraud detection, risk analysis, marketing campaigns, etc.

In this course all the stages of the Knowledge Discovery process will be reviewed, focusing on time series, and the most important techniques for each stage will be listed. Emphasis will be placed on techniques for data cleaning and preprocessing that, despite their importance, are often forgotten.

In this subject we want to explore areas of Knowledge Discovery less known, but are becoming increasingly relevant. There are domains where information is presented mostly in the form of Time Series which require a very specialized treatment. Examples of these are medical domains such as Electrocardiography or Audiometry, financial domains, etc. Time series are a challenge to the traditional techniques of Data Mining and often require the use of novel solutions. We will discuss traditional numeric Time Series Techniques, novel approaches and Symbolic approaches.

4.2. Syllabus

- 1. Introduction
 - 1.1. Time Series
 - 1.2. Basic Concepts
- 2. Knowledge Discovery Process
 - 2.1. Knowledge Discovery Process Stages
 - 2.2. Data Preprocessing for Time Series
- 3. KDD Tools
 - 3.1. Background
 - 3.2. A KDD Tool
- 4. Data Mining Techniques for Time Series

- 4.1. Classification
- 4.2. Time Series Analysis and Prediction (with R)
- 4.3. Time Series Specific Techniques
- 4.4. Symbolic techniques

5. Schedule

5.1. Subject schedule*

| Week | Face-to-face classroom activities | Face-to-face laboratory activities | Distant / On-line | Assessment activities |
|------|---|------------------------------------|---|---|
| | 1. Introduction Duration: 01:30 | | 1. Introduction Duration: 01:30 | |
| 1 | 2.1 Knowledge Discovery Process Duration: 01:30 | | 2.1 Knowledge Discovery Process Duration: 01:30 | |
| | 2.2 Data Preprocessing for time series Duration: 01:15 | | 2.2 Data Preprocessing for time series Duration: 01:15 | |
| 2 | Case Study: Knowledge Discovery Process and Data Preprocessing Duration: 00:15 | | Case Study: Knowledge Discovery Process and Data Preprocessing Duration: 00:15 | |
| | 3. KDD Tools Duration: 01:30 | | 3. KDD Tools Duration: 01:30 | |
| 3 | Domain Analysis and KDD Process Duration: 00:40 3.2 Case Study Duration: 01:00 | | Domain Analysis and KDD Process Duration: 00:40 3.2 Case Study Duration: 01:00 | Project Stage 1: Domain Analysys, Data study, Objective definition Continuous assessment Not Presential Duration: 00:20 |
| | 4.1 Classification Techniques for Time Series Duration: 01:20 | | 4.1 Classification Techniques for Time Series Duration: 01:20 | |
| | Group Discussion Duration: 01:00 | | Group Discussion Duration: 01:00 | |
| 4 | 4.2 Time Series Analysis and Prediction (with R) Duration: 02:00 | | 4.2 Time Series Analysis and Prediction (with R) Duration: 02:00 | |
| 5 | 4.2 Time Series Multivariant Analysis and Prediction (with R) Duration: 02:00 | | 4.2 Time Series Multivariant Analysis and Prediction (with R) Duration: 02:00 | |
| | Case Study: Multivariant Analysis Duration: 01:00 | | Case Study: Multivariant Analysis Duration: 01:00 | |

| | | | Duration. 02:00 |
| | | | Attendance to class, participation and |
| | | | evaluable exercises |
| | | | |
| | | | Continuous assessment |
| | | | Not Presential |
| | | | Duration: 00:00 |
| | | <u> </u> | |

Depending on the programme study plan, total values will be calculated according to the ECTS credit unit as 26/27 hours of student face-to-face contact and independent study time.

* The schedule is based on an a priori planning of the subject; it might be modified during the academic year, especially considering the COVID19 evolution.

ANX-PR/CL/001-01 Learning Guide

6. Activities and assessment criteria

6.1. Assessment activities

6.1.1. Continuous assessment

| Week | Description | Modality | Туре | Duration | Weight | Minimum grade | Evaluated skills |
|------|---|----------|---------------|----------|--------|------------------|----------------------------------|
| 3 | Project Stage 1: Domain Analysys, Data study, Objective definition | | No Presential | 00:20 | 10% | / 10 | CECD01 CECD03 |
| 7 | Project Stage 2: Application of Data Mining Techniques | | No Presential | 00:20 | 10% | / 10 | CECD03 CG08 CG11 |
| 17 | Project Presentation | | No Presential | 02:00 | 50% | / 10 | CG08 CG11 |
| 17 | Attendance to class, participation and evaluable exercises | | No Presential | 00:00 | 30% | / 10 | CECD01 CECD03 CG08 CG11 |

6.1.2. Final examination

| Week | Description | Modality | Туре | Duration | Weight | Minimum grade | Evaluated skills |
|------|----------------------|----------|---------------|----------|--------|------------------|----------------------------------|
| 17 | Project complete | | No Presential | 01:00 | 50% | / 10 | CECD01 CECD03 CG08 CG11 |
| 17 | Project Presentation | | No Presential | 02:00 | 50% | / 10 | CG08 CG11 |

6.1.3. Referred (re-sit) examination

| Description | Modality | Туре | Duration | Weight | Minimum grade | Evaluated skills |
|-------------------------------------|----------|--------------|----------|--------|------------------|------------------|
| | | | | | | CECD01 |
| Project complete Face-to-face 00:00 | | Face-to-face | 00:00 | 100% | 5 / 10 | CECD03 |
| | | | | | | CG08 |
| | | | CG11 | | | |

6.2. Assessment criteria

For the evaluation of this subject we will take into account, on the one hand, the attendance and participation in class and, on the other hand, the Data Mining Project.

For the Continuous Evaluation the attendance to class (online or in class), the active participation of the student and the evaluable exercises that are raised in class will be considered.

The Data Mining Project will be evaluated according to the phases described below and their corresponding weights.

Data Mining Project

This project will be done individually or in groups of 2 people. The work will be done incrementally and will be presented in the following phases:

• Phase 1: students will choose a domain to which data they have access, analyze their characteristics and establish the objectives to be achieved through the Data Mining Project. They will write a report indicating the different tasks that would be carried out in each stage of the Knowledge Discovery process according to the specific needs of the domain and the objectives.

• Phase 2: through the use of a Knowledge Discovery software tool, Data Mining algorithms will be applied to the data of each domain. In addition, the student will analyze the limitations of the algorithms available in the tool and possible improvements.

The 2 deliveries of the Data Mining Project are mandatory and will be evaluated according to the weights assigned in the table in the previous section (summative evaluation).

The Data Mining Project will be presented in class (online). Each group will have aproximately 15 minutes for the oral presentation plus 5 minutes of questions.

Qualification standards

The subject will be evaluated on 10 points, divided into 3 points for continuous assessment and 7 for the Data Mining Project. To pass the subject it will be necessary to attend at least 70% of the classes and obtain a final grade of no less than 5 points.

The dates for the delivery of each part of the Data Mining Project will be published at the beggining of the course.

In the extra call, those parts of the Data Mining Project that are pending may be delivered. Continuous assessment will not be repeated, so the grade of the subject will be obtained exclusively from the Data Mining Project.

7. Teaching resources

7.1. Teaching resources for the subject

| Name | Туре | Notes |
|---|--------------|--|
| Time Series Analysis and Its Applications With R Examples - 4th Edition | Bibliography | Book on Time Series Analysis by Shumway and Stoffer |
| A review on time series data mining | Bibliography | Engineering Applications of Artificial Intelligence 24 (2011) 164?181 |
| Data Mining: Concepts and Techniques | Bibliography | Book about Data Mining Techniques. J.Han y M. Kamber. Ed. Morgan Kauffman, 2006. |
| Data Mining: Concepts, Models, Methods, and Algorithms | Bibliography | Book about Data Mining Techniques. M. Kantardzic (eds.), John Wiley & Sons, 2003 |
| From Data Mining to Knowledge Discovery in Databases | Bibliography | Book about some fundational works on nowadays Data Mining Techniques U. Fayyad, G. Piatetsky-Shapiro y P. Smyth, 1996 |
| WEKA | Web resource | Official webpage of the Data Mining Tool WEKA, with tutorials and free download http://www.cs.waikato.ac.nz/ml/weka/ |
| Subject webpage | Web resource | http://www.dlsiis.fi.upm.es/master_muss/asig DCBD.html |

ANX-PR/CL/001-01 Learning Guide

8. Other information

8.1. Other information about the subject

Classes will be taught in English with ocasional on demand paralell explanations in Spanish. Documentation (including transparencies used in class) will be provided in English.

During the course, we will try to use as many the data files related to Sustainable Development Goals of UN as possible, specially number 13 Climate Action

Las clases serán impartidas en ingles con explicaciones paralelas ocasionales en español. La documentación (incluido las transparencias usadas en clase) se proporcionará en Inglés

Durante el curso, se utilizarán tantas ficheros de datos relacionados con Objetivos de Desarrollo Sostenible (ODS) de Naciones Unidas como sea posible, especialmente con el número 13 Acción por el Clima
