

COORDINATION PROCESS OF LEARNING ACTIVITIES PR/CL/001

E.T.S. de Ingenieria de Sistemas Informaticos

SUBJECT

615001047 - Web Development

DEGREE PROGRAMME

61CI - Grado En Ingenieria De Computadores

ACADEMIC YEAR & SEMESTER

2022/23 - Semester 1

Index

Learning guide

1. Description	1
2. Faculty	1
3. Prior knowledge recommended to take the subject	2
4. Skills and learning outcomes	2
5. Brief description of the subject and syllabus	3

9. Other information	10

1. Description

1.1. Subject details

Name of the subject	615001047 - Web Development
No of credits	6 ECTS
Туре	Optional
Academic year ot the programme	Third year
Semester of tuition	Semester 5
Tuition period	September-January
Tuition languages	English
Degree programme	61CI - Grado en Ingenieria de Computadores
Centre	61 - Escuela Tecnica Superior De Ingenieria De Sistemas Informaticos
Academic year	2022-23

2. Faculty

2.1. Faculty members with subject teaching role

Name and surname	Office/Room	Email	Tutoring hours *	
Santiago Alonso Villaverde	1125	santiago.alonso@upm.es	Sin horario.	
(Subject coordinator)	1125	sanuago.alonso@upm.es	Sin norano.	

* The tutoring schedule is indicative and subject to possible changes. Please check tutoring times with the faculty member in charge.

3. Prior knowledge recommended to take the subject

3.1. Recommended (passed) subjects

The subject - recommended (passed), are not defined.

3.2. Other recommended learning outcomes

- Knowledge about relational databases and SQL
- Certain domain about HTML and CSS
- Software design and programming

4. Skills and learning outcomes *

4.1. Skills to be learned

OB05 - Capacidad para concebir, desarrollar y mantener sistemas, servicios y aplicaciones informáticas empleando los métodos de la ingeniería del software como instrumento para el aseguramiento de su calidad, de acuerdo con los conocimientos adquiridos según lo establecido en el apartado 5 del anexo II de la resolución de la Secretaría General de Universidades de 8 de junio de 2009 (BOEA-2009-12977).

4.2. Learning outcomes

RA543 - Be able to build solutions based on Web applications with current development environments

RA544 - be able to build solutions based on Web applications with quality service architectures

RA542 - be able to generate graphical user interfaces for Web applications with current development environments

RA541 - Be able to identify, understand and apply the syntax and semantics of languages for the development of Web applications

* The Learning Guides should reflect the Skills and Learning Outcomes in the same way as indicated in the Degree Verification Memory. For this reason, they have not been translated into English and appear in Spanish.

5. Brief description of the subject and syllabus

5.1. Brief description of the subject

The subject has a marked technological nature, dealing with the design, creation and testing of a complete web system seen from a functional point of view (not graphic or aesthetic design), in such a way that the student who passes it will be able to face, on the one hand, the development necessary to solve the back-end part and, on the other, the front-end or client part.

To do this, some of the techniques and tools currently recommended in these environments will be used, starting with the appropriate versions of ECMAScript or TypeScript and establishing the MEAN development stack with NodeJs for the server part and its programming through Express. Finally, Angular will be seen as a suitable framework for the development of client applications in these environments.

5.2. Syllabus

- 1. Basic concepts in web development
- 2. ECMASCRIPT v6
 - 2.1. Characteristics and syntax of the language
 - 2.2. Language objects
 - 2.3. Classes and objects
 - 2.4. The language in the browser
 - 2.4.1. Browser objects
 - 2.4.2. AJAX
- 3. NodeJs
 - 3.1. Basics of HTTP and REST APIs
 - 3.2. General characteristics
 - 3.3. Native and external modules
 - 3.4. Routing: Express
 - 3.5. Testing
- 4. Angular

- 4.1. General characteristics (data binding) and TypeScript
- 4.2. Components and directives
- 4.3. Navigation and routes
- 4.4. Services
- 4.5. Asynchronous requests

6. Schedule

6.1. Subject schedule*

Week	Classroom activities	Laboratory activities	Distant / On-line	Assessment activities
	Basic web concepts	Basic Web Concepts		
1	Duration: 02:00	Duration: 02:00		
	Lecture Laboratory assignments			
	ECMASCRIPT v6	ECMASCRIPT v6		
2	Duration: 02:00	Duration: 02:00		
	Lecture	Laboratory assignments		
	ECMASCRIPT v6	ECMASCRIPT v6	1	
3	Duration: 02:00	Duration: 02:00		
	Lecture	Laboratory assignments

				RA542, RA543, RA544)
17				Online test
				Final examination
				Not Presential
				Duration: 00:00
				Practical exam. (RA541, RA542, RA543,
				RA544)
				Problem-solving test
				Continuous assessment and final
				examination
				Presential
	1		1	Duration: 02:00

Depending on the programme study plan, total values will be calculated according to the ECTS credit unit as 26/27 hours of student face-to-face contact and independent study time.

* The schedule is based on an a priori planning of the subject; it might be modified during the academic year, especially considering the COVID19 evolution.

ANX-PR/CL/001-01 Learning Guide

7. Activities and assessment criteria

7.1. Assessment activities

7.1.1. Assessment

Week	Description	Modality	Туре	Duration	Weight	Minimum grade	Evaluated skills
8	First Practical work. Front-end development with ECMASCRIPT (RA541, RA542, RA543, RA544)	Online test	No Presential	00:00	20%	3/10	OB05
15	Second practical work. back-end with Node and front-end with Angular (RA541, RA542, RA543, RA544)	Online test	No Presential	00:00	60%	3/10	OB05
17	Practical exam. (RA541, RA542, RA543, RA544)	Problem- solving test	Face-to-face	02:00	20%	4 / 10	OB05

7.1.2. Global examination

Week	Description	Modality	Туре	Duration	Weight	Minimum grade	Evaluated skills
17	First Practical work. Front-end development with ECMASCRIPT (RA541, RA542, RA543, RA544)	Online test	No Presential	00:00	20%	5/10	OB05
17	Second practical work. back-end with Node and front-end with Angular (RA541, RA542, RA543, RA544)	Online test	No Presential	00:00	60%	5/10	OB05
17	Practical exam. (RA541, RA542, RA543, RA544)	Problem- solving test	Face-to-face	02:00	20%	4 / 10	OB05

7.1.3. Referred (re-sit) examination

Description	Modality	Туре	Duration	Weight	Minimum grade	Evaluated skills
First Practical work. Front-end						
development with ECMASCRIPT	Online test	Face-to-face	00:00	20%	5 / 10	OB05
(RA541, RA542, RA543, RA544)						

Second practical work. back-end with Node and front-end with Angular (RA541, RA542, RA543, RA544)	Online test	Face-to-face	00:00	60%	5 / 10	OB05
Practical exam. (RA541, RA542, RA543, RA544)	Problem- solving test	Face-to-face	02:00	20%	5 / 10	OB05

7.2. Assessment criteria

Progressive evaluation - To pass the course, the student must do first (1PW) and second practical work (2PW) and get, at least, a 3 over 10 points and do the practical exam (PE - 17th week), obtaining, at least, a 4 over 10 points.

Final grade, will be: Final grade = 1PW * 0.2 + 2PW *0.6 + PE*0.2

This final grade should be at least 5 over 10 to pass the course

If the student does not get a grade at least 3 over 10 (4 over 10 in PE) in any work, **he/she will be able to present those failed works again** just before he/she does the practical exam (17th week), having then, to get at least a 5 over 10 points.

Referred (re-sit) examination -

To pass the course doing the this call for exam, the student must do first (1PW) and second practical work (2PW) and get, at least, 5 points out of 10 in each, and do the practical exam (PE - 17th week), obtaining, at least, a 4 over 10 points.

Final grade, will be: Final grade = 1PW * 0.2 + 2PW *0.6 + PE*0.2

This final grade should be at least 5 over 10 to pass the course

If the student does not get the minimum grade in any of the evaluation activities he/she will **fail the course** and his/her final grade will be the minimum of the grades of the different activities done.

ATTENTION:

- If any type of fraud is detected in any of the evaluation activities, the student/s will get a zero as final grade in the current convocatory and the teacher may propose a special and equivalent exam in the next call for exam.

8. Teaching resources

8.1. Teaching resources for the subject

Name	Туре	Notes		
		The whole pack of documentation and		
Moodle UPM	Web resource	examples used in class by the teacher. 		
		It is documentation elaborated by the teacher		
JavaScript : the definitive guide,	Piblicgrophy	Advanced hibliography about ECMSACPIDT		
Flanagan, David, O'Reilly 2011	Bibliography	Advanced bibliography about ECMSACRIPT		
JavaScript patterns, Stefanov,	Piblicgrophy	patterns and programming with javascript		
Stoyan, O'Reilly 2010	Bibliography
