6. Descripción de la asignatura y temario

6.1. Descripción de la asignatura

The students will start with an introduction to communicating in professional and academic contexts (understanding and producing communication events): audience analysis, purpose analysis, selection and adaptation of the contents according to audiences and purposes. Then the students will work on a project report taking into consideration stakeholder theory and ethical consequences of technical decisions. This will be followed by criteria to understand university lectures and academic literature while learning how to avoid plagiarism in communication. The course ends with the application of communication criteria to the context of job seeking among international companies.
