1. Description

1.1. Subject details

Name of the subject	595010252 - Introduction To Artificial Intelligent In The Cloud
No of credits	4.5 ECTS
Type	Optional
Academic year of the programme	Third year
Semester of tuition	Semester 6
Tuition period	February-June
Tuition languages	English
Degree programme	59TL - Grado en Ingeniería Telemática
Centre	59 - Escuela Técnica Superior De Ingeniería Y Sistemas De Telecomunicación
Academic year	2022-23

2. Faculty

2.1. Faculty members with subject teaching role

Name and surname	Office/Room	Email	Tutoring hours *
Eduardo Juarez Martinez	A4204	eduardo.juarez@upm.es	Sin horario. Las tutorías se pueden consultar en la página web de la ETSIST
Fernando Pescador Del Oso (Subject coordinator)	A4211	fernando.pescador@upm.es	Sin horario. Las tutorías se pueden consultar en la página web de la ETSIST

Juana Maria Gutierrez Arriola	A7008	juana.gutierrez.arriola@upm. es	Sin horario. Las tutorías se pueden consultar en la página web de la ETSIST
----------------------------------	-------	------------------------------------	---

* The tutoring schedule is indicative and subject to possible changes. Please check tutoring times with the faculty member in charge.

3. Skills and learning outcomes *

3.1. Skills to be learned

CE B2 - Conocimientos básicos sobre el uso y programación de los ordenadores, sistemas operativos, bases de datos y programas informáticos con aplicación en ingeniería.

CE TEL01 - Capacidad para aprender de manera autónoma nuevos conocimientos y técnicas adecuados para la concepción, el desarrollo o la explotación de sistemas y servicios de telecomunicación.

CE TEL07 - Conocimiento y utilización de los fundamentos de la programación en redes, sistemas y servicios de telecomunicación.

CE TL07 - Capacidad de programación de servicios y aplicaciones telemáticas, en red y distribuidas.

CG 11 - Habilidades para la utilización de las Tecnologías de la Información y las Comunicaciones.

3.2. Learning outcomes

RA232 - Se concretarán para cada asignatura optativa o para la realización de prácticas en empresas.

RA1280 - Explicar los conceptos de datos relacionales y no relacionales en Azure

RA1281 - Identificar los componentes de un almacenamiento de datos moderno en Azure

RA1282 - Describir las características de las cargas de trabajo de la visión artificial, el procesamiento del lenguaje natural y la AI conversacional en Azure

RA1278 - Explicar conceptos generales de informática en la nube y los servicios principales disponibles con Microsoft Azure

RA1279 - Explicar las características de seguridad y seguridad en red de Microsoft Azure

RA1283 - Describir los principios fundamentales del aprendizaje automático en Azure

* The Learning Guides should reflect the Skills and Learning Outcomes in the same way as indicated in the Degree Verification Memory. For this reason, they have not been translated into English and appear in Spanish.

4. Brief description of the subject and syllabus

4.1. Brief description of the subject

The course is divided into three modules that correspond to three basic Microsoft certifications that are part of the Microsoft Learn for Educators program.

The first module introduces the concepts and services available in Microsoft Azure. AZ-900 Certification (<https://docs.microsoft.com/es-es/learn/certifications/exams/az-900>)

The second module exposes the fundamental concepts of cloud databases and develops Microsoft Azure data services. DP-900 Certification (<https://docs.microsoft.com/es-es/learn/certifications/exams/dp-900>)

The third module introduces artificial intelligence and Microsoft Azure services that can be used to create AI solutions. AI-900 Certification (<https://docs.microsoft.com/es-es/learn/certifications/exams/ai-900>)

Students who follow the subject will take the official certification exams organized by the university within the Microsoft Learn for Educators program free of charge.

4.2. Syllabus

1. Azure Fundamentals
 - 1.1. Azure main concepts
 - 1.2. Most important services of Azure
 - 1.3. Most important administrative solutions and tools in Azure
 - 1.4. General concepts of security in Azure
 - 1.5. Describe the features of identity, governance and privacy
2. Introduction to Microsoft Azure Data
 - 2.1. Explore the Data Base concepts
 - 2.2. Relational data in Azure
 - 2.3. Non relational data in Azure
 - 2.4. Explore new data storage systems in Azure
3. Introduction to Microsoft Azure AI
 - 3.1. Introduction to AI
 - 3.2. Automatic Learning
 - 3.3. Artificial Vision
 - 3.4. Natural Language Processing (NLP)
 - 3.5. Conversational AI

5. Schedule

5.1. Subject schedule*

Week	Face-to-face classroom activities	Face-to-face laboratory activities	Distant / On-line	Assessment activities
1	Azure fundamentals Duration: 01:00 Lecture	Azure Practices Duration: 02:00 Laboratory assignments		
2	Azure fundamentals Duration: 01:00 Lecture	Azure Practices Duration: 02:00 Laboratory assignments		
3	Azure fundamentals Duration: 01:00 Lecture	Azure Practices Duration: 02:00 Laboratory assignments		
4	Azure fundamentals Duration: 01:00 Lecture	Data exercises Duration: 02:00 Laboratory assignments		
5	Azure Data Duration: 01:00 Lecture	Data exercises Duration: 01:00 Laboratory assignments		Evaluation Azure Written test Continuous assessment Presential Duration: 01:00
6	Azure Data Duration: 01:00 Lecture	Data exercises Duration: 02:00 Laboratory assignments		
7	Azure Data Duration: 01:00 Lecture	Data exercises Duration: 02:00 Laboratory assignments		
8	Azure Data Duration: 01:00 Lecture	Data exercises Duration: 02:00 Laboratory assignments		
9	Azure AI Duration: 01:00 Lecture	AI practices Duration: 01:00 Laboratory assignments		Evaluation Azure Data Written test Continuous assessment Presential Duration: 01:00
10	Azure AI Duration: 01:00 Lecture	AI practices Duration: 02:00 Laboratory assignments		
11	Azure AI Duration: 01:00 Lecture	AI practices Duration: 02:00 Laboratory assignments		
12	Azure AI Duration: 01:00 Lecture	AI practices Duration: 02:00 Laboratory assignments		

13	Summary Duration: 03:00 Lecture			
14				
15				
16				
17				Evaluation Azure AI Written test Continuous assessment Presential Duration: 01:00 Examen global Written test Final examination Not Presential Duration: 03:00

Depending on the programme study plan, total values will be calculated according to the ECTS credit unit as 26/27 hours of student face-to-face contact and independent study time.

* The schedule is based on an a priori planning of the subject; it might be modified during the academic year, especially considering the COVID19 evolution.

6. Activities and assessment criteria

6.1. Assessment activities

6.1.1. Continuous assessment

Week	Description	Modality	Type	Duration	Weight	Minimum grade	Evaluated skills
5	Evaluation Azure	Written test	Face-to-face	01:00	34%	5 / 10	CE TEL07 CE TL07 CE B2 CE TEL01 CG 11
9	Evaluation Azure Data	Written test	Face-to-face	01:00	33%	5 / 10	CE TEL07 CE TL07 CE B2 CE TEL01 CG 11
17	Evaluation Azure AI	Written test	Face-to-face	01:00	33%	5 / 10	CE TEL07 CE TL07 CE B2 CE TEL01 CG 11

6.1.2. Final examination

Week	Description	Modality	Type	Duration	Weight	Minimum grade	Evaluated skills
17	Examen global	Written test	No Presential	03:00	100%	5 / 10	CE TEL07 CE TL07 CE B2 CE TEL01 CG 11

6.1.3. Referred (re-sit) examination

Description	Modality	Type	Duration	Weight	Minimum grade	Evaluated skills
-------------	----------	------	----------	--------	---------------	------------------

Examen extraordinario	Written test	Face-to-face	03:00	100%	5 / 10	CE TEL07 CE TL07 CE B2 CE TEL01 CG 11
-----------------------	--------------	--------------	-------	------	--------	---

6.2. Assessment criteria

Progressive evaluation

During the semester, three evaluation activities will be carried out, one for each of the topics in which the subject is divided.

The subject can only be passed by progressive evaluation if at least 5 points are obtained by adding the weighted scores of the different evaluation tests.

If the minimum of 5 points is not reached in any continuous evaluation test, the maximum grade that can be obtained by progressive evaluation is 4.5.

For the global and extraordinary evaluation, the topics in which more than 5 points have been obtained will be released.

Global evaluation

The student who does not pass some of the first two evaluation tests will be able to recover them on the date on which the third is carried out and which is marked by the Subdirección de Ordenación Académica. Students who wish to improve their grade in one of the first two tests can also take these make-up exams.

Extraordinary exam

In the extraordinary exam, students who have not passed any of the evaluation tests will have the possibility of recovering them on the date set by the Head of Studies for the extraordinary exam.

Final remarks

The modules are not maintained for the next course

7. Teaching resources

7.1. Teaching resources for the subject

Name	Type	Notes
Moodle	Others	B-learning platform
Virtual Lab	Web resource	Microsoft virtual platform
Microsoft Certification Description	Web resource	https://docs.microsoft.com/es-es/Learn/
Slices	Others	

8. Other information

8.1. Other information about the subject

The calendar that appears in the guide is indicative since it does not include holidays. The specific dates will be published in the Moodle of the subject.

The subject is related to SDG4 "Ensure inclusive, equitable and quality education and promote lifelong learning opportunities for all". Specifically, with the goal "4.4 By 2030, considerably increase the number of young people and adults who have the necessary skills, in particular technical and professional, to access employment, decent work and entrepreneurship".

The subject is related to SDG9 "Build resilient infrastructure, promote sustainable industrialization and foster innovation". Specifically, with part of the target "9.c Significantly increase access to information and communications technology and strive to provide universal and affordable access to the Internet in the least developed countries by 2030.
