## 1. Description

### 1.1. Subject details

<b>Name of the subject</b>	103000879 - Virtual Intelligent Systems
<b>No of credits</b>	4 ECTS
<b>Type</b>	Optional
<b>Academic year of the programme</b>	Second year
<b>Semester of tuition</b>	Semester 3
<b>Tuition period</b>	September-January
<b>Tuition languages</b>	English
<b>Degree programme</b>	10AZ - Master Universitario en Innovación Digital
<b>Centre</b>	10 - Escuela Técnica Superior De Ingenieros Informáticos
<b>Academic year</b>	2023-24

## 2. Faculty

### 2.1. Faculty members with subject teaching role

<b>Name and surname</b>	<b>Office/Room</b>	<b>Email</b>	<b>Tutoring hours *</b>
Jose Maria Barambones Ramirez	5106	j.barambones@upm.es	M - 10:00 - 12:00 Tu - 10:00 - 12:00 W - 10:00 - 12:00
Angelica De Antonio Jimenez (Subject coordinator)	5108	angelica.deantonio@upm.es	W - 10:30 - 14:00 Th - 09:30 - 12:00 Previous appointment is needed. Contact at angelica.deantonio @upm.es

\* The tutoring schedule is indicative and subject to possible changes. Please check tutoring times with the faculty member in charge.

### 3. Skills and learning outcomes \*

---

#### 3.1. Skills to be learned

CB06 - Poseer y comprender conocimientos que aporten una base u oportunidad de ser originales en el desarrollo y/o aplicación de ideas, a menudo en un contexto de investigación

CB07 - Que los estudiantes sepan aplicar los conocimientos adquiridos y su capacidad de resolución de problemas en entornos nuevos o poco conocidos dentro de contextos más amplios (o multidisciplinares) relacionados con su área de estudio

CB08 - Que los estudiantes sean capaces de integrar conocimientos y enfrentarse a la complejidad de formular juicios a partir de una información que, siendo incompleta o limitada, incluya reflexiones sobre las responsabilidades sociales y éticas vinculadas a la aplicación de sus conocimientos y juicios

CB09 - Que los estudiantes sepan comunicar sus conclusiones y los conocimientos y razones últimas que las sustentan a públicos especializados y no especializados de un modo claro y sin ambigüedades

CE-DIPO02 - Capacidad para evaluar la interacción persona-ordenador de productos y servicios de alto valor innovador

CE-DIPO03 - Habilidad para hacer conexiones entre los deseos y necesidades del consumidor o cliente y lo que la tecnología puede ofrecer

CG03 - La capacidad de usar la lengua inglesa de manera competente, es decir, con capacitación para tareas complejas de trabajo y estudio.

CG06 - Capacidad para gestionar la información.

## 3.2. Learning outcomes

RA31 - Be able to sketch a project for the development of an intelligent virtual environment, establishing the process to be followed, the technologies to be used, the interaction possibilities to offer, and the role to be played by intelligent virtual agents, selecting the most appropriate technologies, architectures and tools for the development.

RA32 - Be able to design and conduct a research process in the área of technologies, architectures, intelligent agent capabilities, or human-computer interaction, in the context of an intelligent virtual environment

RA99 - Understand tools and process needed to deploy virtual reality applications

\* The Learning Guides should reflect the Skills and Learning Outcomes in the same way as indicated in the Degree Verification Memory. For this reason, they have not been translated into English and appear in Spanish.

## 4. Brief description of the subject and syllabus

---

### 4.1. Brief description of the subject

This subject allows deepening into Intelligent Virtual Environments as a specific kind of computer systems:

- with very peculiar characteristics regarding human computer interaction (three dimensional environments in which the user is immersed and interacts with the objects, other users and autonomous agents)
- with specific technologies that support their construction and use (Virtual Reality and Augmented Reality devices)
- with very important and promising applications that demand more research and development efforts (such as educational or design applications)
- and still with many open challenges and research opportunities for the future

The main research and development trends in the area of Intelligent Virtual Environments will be presented, with a special focus on the peculiarities of 3D interaction, the challenges associated with the design of intelligent virtual agents, and educational applications.

## 4.2. Syllabus

1. Virtual Reality and Augmented Reality Technologies
  - 1.1. Basic Concepts in Virtual and Augmented Reality
  - 1.2. Devices and Technologies for Virtual and Augmented Reality
  - 1.3. Specific Challenges in Augmented Reality
2. Virtual Environment Development
  - 2.1. Tasks and Tools for the Development of a Virtual Environment
  - 2.2. VE Development Tools
3. 3D Interaction tasks, techniques and challenges
4. Virtual Humans
  - 4.1. Architecture and Components of a Virtual Human
  - 4.2. Perception in a Virtual Human
  - 4.3. The Mind of a Virtual Human
  - 4.4. Actuation Capabilities in a Virtual Human
5. Virtual Reality and Augmented Reality Applications

## 5. Schedule

### 5.1. Subject schedule\*

Week	Classroom activities	Laboratory activities	Distant / On-line	Assessment activities
1	<b>Subject Presentation</b> Duration: 02:00 Lecture			
2	<b>Chapter 1 - VR and AR Concepts</b> Duration: 02:00 Lecture			
3	<b>Chapter 1 - VR and AR Technologies</b> Duration: 02:00 Lecture			
4	<b>Chapter 1 - VR and AR Technologies</b> Duration: 02:00 Lecture			<b>Reading test in Moodle</b> Online test Continuous assessment and final examination Not Presential Duration: 04:00
5	<b>Chapter 1 - Specific Challenges in AR</b> Duration: 02:00 Lecture			
6	<b>Chapter 2 - Tasks for VE development</b> Duration: 02:00 Lecture			
7	<b>Chapter 2 - Tasks for VE development</b> Duration: 02:00 Lecture			<b>Reading Test in Moodle</b> Online test Continuous assessment and final examination Not Presential Duration: 04:00
8		<b>Chapter 2 - VE Development Tools</b> Duration: 02:00 Laboratory assignments		
9		<b>Chapter 2 - VE Development Tools</b> Duration: 02:00 Laboratory assignments		
10	<b>Chapter 3 - 3D Interaction</b> Duration: 02:00 Lecture			<b>Reading test in Moodle</b> Online test Continuous assessment and final examination Not Presential Duration: 04:00
11	<b>Chapter 3 - 3D Interaction</b> Duration: 02:00 Lecture			

12	<b>Chapter 4 - Architecture and Components of a Virtual Human</b> Duration: 02:00 Lecture			
13	<b>Chapter 4 - Perception in a Virtual Human</b> Duration: 02:00 Lecture			<b>Reading Test in Moodle</b> Online test Continuous assessment and final examination Not Presential Duration: 04:00
14	<b>Chapter 4 - The Mind of a Virtual Human</b> Duration: 02:00 Lecture			
15	<b>Chapter 4 - Actuation capabilities in a Virtual Human</b> Duration: 01:00 Lecture  <b>Chapter 5 - XR Applications</b> Duration: 01:00 Lecture			
16				<b>Participation in the classroom</b> Other assessment Continuous assessment Presential Duration: 00:00  <b>Presentation of Research and Development Work</b> Individual presentation Continuous assessment and final examination Presential Duration: 06:00  <b>Research Work</b> Individual work Continuous assessment and final examination Not Presential Duration: 24:00  <b>VE development practice</b> Individual work Continuous assessment and final examination Not Presential Duration: 24:00
17				

Depending on the programme study plan, total values will be calculated according to the ECTS credit unit as 26/27 hours of student face-to-face contact and independent study time.

\* The schedule is based on an a priori planning of the subject; it might be modified during the academic year, especially considering the COVID19 evolution.

## 6. Activities and assessment criteria

### 6.1. Assessment activities

#### 6.1.1. Assessment

Week	Description	Modality	Type	Duration	Weight	Minimum grade	Evaluated skills
4	Reading test in Moodle	Online test	No Presential	04:00	5%	/ 10	CB06
7	Reading Test in Moodle	Online test	No Presential	04:00	5%	/ 10	CB06
10	Reading test in Moodle	Online test	No Presential	04:00	5%	/ 10	CB06
13	Reading Test in Moodle	Online test	No Presential	04:00	5%	/ 10	CB06
16	Research Work	Individual work	No Presential	24:00	30%	4 / 10	CB06 CB08 CB09 CG03 CG06
16	Presentation of Research and Development Work	Individual presentation	Face-to-face	06:00	15%	5 / 10	CB09 CG03
16	Participation in the classroom	Other assessment	Face-to-face	00:00	5%	/ 10	
16	VE development practice	Individual work	No Presential	24:00	30%	4 / 10	CE-DIPO02 CE-DIPO03 CB07 CG03

#### 6.1.2. Global examination

Week	Description	Modality	Type	Duration	Weight	Minimum grade	Evaluated skills
4	Reading test in Moodle	Online test	No Presential	04:00	5%	/ 10	CB06
7	Reading Test in Moodle	Online test	No Presential	04:00	5%	/ 10	CB06
10	Reading test in Moodle	Online test	No Presential	04:00	5%	/ 10	CB06
13	Reading Test in Moodle	Online test	No Presential	04:00	5%	/ 10	CB06
16	Research Work	Individual work	No Presential	24:00	30%	4 / 10	CB06 CB08 CB09 CG03 CG06

16	Presentation of Research and Development Work	Individual presentation	Face-to-face	06:00	15%	5 / 10	CB09 CG03
16	VE development practice	Individual work	No Presential	24:00	30%	4 / 10	CE-DIPO02 CE-DIPO03 CB07 CG03

### 6.1.3. Referred (re-sit) examination

Description	Modality	Type	Duration	Weight	Minimum grade	Evaluated skills
Reading tests in Moodle	Online test	Face-to-face	09:00	20%	/ 10	CB06
Research work	Individual work	Face-to-face	20:00	30%	4 / 10	CB08 CB09 CB06 CG03 CG06
VE development practice	Individual work	Face-to-face	20:00	30%	4 / 10	CE-DIPO02 CG03 CE-DIPO03 CB07
Presentation of Research and Development Work	Individual presentation	Face-to-face	05:00	15%	5 / 10	CB09 CG03
Participation in the classroom	Other assessment	Face-to-face	00:00	5%	/ 10	

## 6.2. Assessment criteria

### Course evaluation system

The course has a theoretical and a practical side.

The theoretical part will be dealt with through lectures and the established mandatory readings. This part will be evaluated via Moodle tests.

The practical part will be evaluated with two individual works.

1. A research work that consists on an initiation to research. Each student will deepen into one of the topics proposed by the professors.

A report will be produced as a result of the research work. This report should have a minimum length of 15 pages,

not counting references. The report should offer a historical perspective (what has been done, and when) as well as a technical perspective (description of the main results in the area, viewpoints, contributions...). A critical approach and the identification of research opportunities will be positively valued.

The work can also consist on the design of an experimental work. In this case, an application area will be chosen, one or more interesting hypotheses should be posed, and a procedure to test the hypotheses should be designed.

For each document or paper that has been read in the preparation of the report (even if finally it was not relevant and cited in the report) a brief summary paragraph should be written. The report should include an appendix with all these summaries.

At the end of the semester, each student should perform a final presentation of the work and the results obtained.

2. A development work that consists on the creation of one or more virtual or augmented reality systems, according to the guidelines provided.

At the end of the semester, each student should perform a final presentation of the developed systems and the results obtained.

The weights for the assessment of the different activities are as follows:

- Moodle Tests: 20%
- Research Work: 30%, comprising:
  - Final report: 25%
  - Bibliographic Analysis: 5%
- Development Work: 30%
- Final Presentation: 15%
- Participation in the classroom: 5%

All activities, except for the participation in the classroom, can be delivered progressively or as a global evaluation at the end of the semester.

### Extraordinary evaluation

Only the evaluation activities not submitted for the ordinary evaluation (progressive or global), or those that have

not reached the minimum grade, can be submitted for the extraordinary evaluation. For all previously submitted activities, the grades obtained in ordinary evaluation will be considered for the computation of the final grade.

## 7. Teaching resources

### 7.1. Teaching resources for the subject

Name	Type	Notes
Understanding Virtual Reality: Interface, Application, and Design, William R. Sherman, Alan Craig, Morgan Kaufmann, 2003	Bibliography

## 8. Other information

### 8.1. Other information about the subject

The course is related to the Sustainable Development Goals SDG3, SDG4 and SDG9.

- SDG3 Good Health and Wellbeing - Ensuring healthy lives and promoting well-being at all ages is essential to sustainable development. Extended Reality is successfully being applied in the health domain, with interesting applications in rehabilitation, psychological treatment, improvement of physical and cognitive state in older people, and others. The course presents the potential of XR in this domain.
- SDG4 Quality Education - Education enables upward socioeconomic mobility and is a key to escaping poverty. Extended Reality can increase the opportunities to access high quality education and training. The course presents the potential of XR in this domain.
- SDG9 Industry, Innovation and Infrastructure - Least developed countries, in particular, need to accelerate the development of their manufacturing sector. Extended Reality can help to minimize the cost of training manufacturing personnel, planning and evaluating manufacturing processes. The course presents the potential of XR in this domain.
