

# (GAMMI) - Gigaethernet Acquisition Module for Molecular Imaging

## Contact information

### Address: Main researchers:

- ANDRES DE SANTOS LLEO

**andres.santos@upm.es**

- PEDRO GUERRA GUTIERREZ

**pedro.guerra@upm.es**

- MARIA JESUS LEDESMA CARBAYO

**mj.ledesma@upm.es**

## Technological Offers type

Software

## Where?

Biomedical imaging technology Information Processing and Telecommunications Center

## Software description

Manages the acquisition of scintillation events generated by a gamma radiation detector and sends them to an external device using a GigaEthernet communications link.

## Reference

M-9497/2013
