

# Software for simulating and modelling microcontroller-based biological processes

## Contact information

### Address: Main researchers:

- JUAN BAUTISTA CASTELLANOS PEÑUELA

[juan.castellanos@upm.es](mailto:juan.castellanos@upm.es)

- ABRAHAM GUTIERREZ RODRIGUEZ

[abraham.gutierrez@upm.es](mailto:abraham.gutierrez@upm.es)

## Technological Offers type

Software

## Where?

KNOWledge Discovery and Information Systems (KNODIS)

## Software description

The software provides a set of libraries, with different abstraction levels, for simulating biological processes on distributed hardware based on the use of microcontrollers.
